Projects

Dev Assist

Built using React.js, Flask and Selenium, This Virtual Assistant was created for TreeHacks annual Hackathon 2021, hosted by Stanford University. It takes user's queries related to coding as input and scrapes the internet to provide a solution. Link: <https://priyavkaneria.github.io/Dev-Assist>

Project K.I.S.S. - Keep It Simple Stupid

Built using Flask, the project is aimed to provide an immersive experience for frontend practice (HTML, CSS and JavaScript) along with the presence of a Music Player and a To-Do List, all in a single place, while also providing basic functionalities like Login, Signup, Admin Dashboard etc. Link: <http://project-k-i-s-s-akshat007.vercel.app/>

Chatter-Type

A terminal-style chat application built using Electron.js and Socket.IO. Link: <https://chatter-type.vercel.app/>
